

Kazi Fardin Islam

Bashabo, Dhaka | fardinislamsadnan@gmail.com | +8801886694400 | LinkedIn | GitHub | Portfolio

Recent Information and Communication Engineering graduate with a strong foundation in object-oriented software development, algorithms, and problem-solving. Hands-on experience building backend and full-stack web applications, with a growing interest in Machine Learning and AI-assisted engineering. A fast learner who thrives in collaborative, cross-functional teams.

EDUCATION

University of Rajshahi BSc in Information and Communication Engineering Relevant Coursework: Data Structures & Algorithms, OOP (Java), DBMS, Computer Networks, Software Engineering, Artificial Intelligence & Neural Networks, Cryptography	Rajshahi, Bangladesh CGPA: 3.60/4.00 Mar 2022 – Jul 2026
---	---

PROBLEM SOLVING & COMPETITIONS

- Codeforces Specialist:** Peak rating **1584**, built through consistent rated-contest performance and a strong command of algorithms and data structures. [\[Profile\]](#)
- ICPC & IUPC:** 2× ICPC Dhaka Regional Finalist (2024, 2025), ranked **48th/310+** in 2025; top IUPC finishes — MU **31st/91**, BUET **46th/110**, and CUET **62nd/130**.
- Hackathons:** Finalist in **HackTheAI by SmythOS** (29th/100+ prelim), **InnovateX 2026** and **BUET GameJam 2023** (11th prelim).

TECHNICAL SKILLS

Languages: Python, C#, JavaScript, TypeScript, C, C++, Java, Dart
Backend & Databases: FastAPI, Node.js, Express.js, PostgreSQL, MySQL, Redis, Supabase
Frontend, Mobile & Game Dev: React, Next.js, HTML/CSS, Flutter, Unity
AI-Assisted Development: Claude Code, OpenAI Codex, Gemini CLI
Developer Tools: Git, GitHub, Docker, Postman
Core Concepts: Object-Oriented Design, Data Structures, Algorithms, DBMS, REST APIs, Microservices

PROJECTS

LLM Gateway — Unified Multi-Provider LLM API (Ongoing) <i>Tech Stack: Python, FastAPI, PostgreSQL, Redis (Lua), Next.js/TypeScript, Supabase Auth</i> - Built an OpenAI-compatible API gateway unifying three free-tier LLM providers (Gemini, Groq, OpenRouter) behind a single contract, giving client apps provider-agnostic access without hand-rolled failover. - Designed a provider-adaptor protocol with a typed error taxonomy that drives automatic mid-stream failover, restarting a dropped stream on a different provider with zero duplicate output. - Enforced conversation integrity with a canonical message schema and atomic Redis/Lua quota accounting across heterogeneous per-provider rate limits.	Live Demo GitHub
ICentral — Department Community Platform <i>Tech Stack: React (Vite), Node.js, Express, PostgreSQL, Docker</i> - Built a full-stack department community platform with a centralized API gateway and modular services for authentication, users, posts, jobs, and chat. - Implemented JWT authentication and role-based access control for protected routes, moderation workflows, and alumni verification. - Developed integrated community features including feed posts, collaboration requests, job applications, notifications, and real-time messaging.	Live Demo GitHub

LEADERSHIP & COMMUNITY

Programming Club, University of Rajshahi Programming Instructor & Problem Setter	Rajshahi, Bangladesh Jan 2026 – Jul 2026
- Coached students in competitive programming with focused training on recursion, backtracking, graph algorithms, and broader problem-solving strategies. - Authored algorithmic problems for an Inter-University Programming Contest celebrating International Girls in ICT Day, in collaboration with IEEE BS, IEEE WIE, and IEEE RUSB.	
IEEE RUSB CS Chapter Vice President	Rajshahi, Bangladesh Apr 2025 – Feb 2026
- Directed a 5-member executive committee to plan and deliver technical seminars, workshops, and student events. - Oversaw event coordination and team communication, growing student participation in chapter activities.
